ANY FURTHER NOTES

Although not mandatory, classroom attendance is strongly recommended.

There are no propaedeutic units to attend the second-year activities.

Students are required to submit their study plan through the UNIWEB platform as early as the first enrolment year.

This document has been prepared in Spring 2025.

It is strongly recommended to check, at the beginning of each academic year, the correct placement of the course units in the semesters and the actual activation of the free-choice activities.

If the free-choice activities are chosen from those offered by the degree course, the plan will be automatically approved.

If the activities offered in the Master's degree have a program that largely overlaps with exams already taken during the Bachelor's degree, students need to contact the Academic Office through the HelpDesk system (https://helpdesk.dii.unipd.it).

The request must include the words "Exam program overlapping" and students need to attach the program of the exam already taken.
