

AMS 2026

The license is valid from today until 2027-02-01, on 1 machine.

Getting started with AMS2026 is easy: just download, install and run.

1. Download

Get the right binary for your machine from <https://www.scm.com/downloads/> using:

SCM User ID: u27479

password: XpHEAmZS

2. Install

- a. Windows: run the exe with Administrator privileges, accepting all defaults.
- b. Mac: open the dmg and drag the AMS2026.xxx item to the Applications directory.
- c. Linux desktop: follow the instructions in the Linux Quick Start guide: https://www.scm.com/doc/Installation/Linux_Quickstart_Guide.html

If you want to evaluate AMS on a Linux cluster, let us know.

3. Run

- a. Windows: double-click the AMSjobs shortcut
- b. Mac: run the AMS2026.xxx application
- c. Linux: set up your environment, run \$AMSBIN/amsjobs

You will be prompted for your username, password, and email address when you first use AMS. After submitting your (correct) details, a license will then automatically be retrieved and installed. This license will allow you to run the purchased AMS modules.

If you do not succeed, you can check our instruction videos about installation of AMS at https://www.youtube.com/playlist?list=PLi0cNtWupX-CL5jLyn9_jrB3rtgTP9cf

If you get a license error please send the error message to license@scm.com.

Please contact your course/research leader with any questions or problems.

We hope you will enjoy using AMS.
