

Apply for a Job in Manica Group

General data of the organization:

- name of the organization: MANICA SPA
- headquarter(s): ROVERETO, Via All'Adige, 4 – 38068 (TN) – Italy
- official website: www.manica.com

Brief presentation of the organization:

Italian chemical company, founded by Ettore Manica in the 1948 now at the 3rd generation, Manica manufactures plant protection products following all requirements provided for by Reg. 1107/2009 CE. Manica has also other business unit in animal feed additive and chemicals copper based for industry and plating and catalyst. It's family run company with 85 employees.

The company has 2 plant sites one in Rovereto (TN) and another in Tortosa (Catalunya) ES.

Manica's mission is to promote its products following a green path (reducing carbon and water footprint) following the principles of Green Chemistry to improve business performance through this value, becoming a world reference in the manufacturing of copper base products in general.

Manica has a strong brand identity in Italy and work worldwide getting year by year new partnerships and opportunities. Our manufacture site in Tortosa represents a true opportunity of professional exchange between Rovereto and Spanish site.

Manica Group is also active in some initiatives like flow batteries, phito extraction technology, and other partnerships. Our sister company are Manicacobre (ES), Manica Polska (PL) Manica Portuguesa (P). For this reason, almost all office's staff speak at least English fluently.

References: fungicides well known in Italian agriculture market are, Bordoflow SC, Poltiglia 20 WG and Ossiclor 35 WG, Manamid SC. The core business for Manica historically is basic a raw material for industry: copper sulfate pentahydrate, for animal feed and for hi-tech proposes.
