

Iason Consulting

Data Scientist (DS)

Firm description

Iason is an international firm that consults Financial Institutions on Risk Management.

Iason is a leader in quantitative analysis and advanced risk methodology, offering a unique mix of know-how and expertise on the pricing of complex financial products and the management of financial, credit and liquidity risks. In addition, Iason provides a suite of essential solutions to meet the fundamental needs of Financial Institutions.

Iason is searching for *Data Scientist(s)* to be staffed in important projects for international clients. Positions are available now. To apply please complete the application form, submit your CV online at: <https://www.iasonltd.com/jobs>

Brief description of the position

We are looking for motivated data scientists with an academic background in STEM or economy/finance. Some basic knowledge in Probability Theory, Inferential Statistics, Machine Learning and programming languages (i.e. Python) is required. Familiarity with standard data science libraries in Python, such as Numpy, Pandas and ScikitLearn is also a plus.

Main Tasks

- Use data analysis and statistical techniques to extract value from data.
- Choose, train and maintain Machine Learning algorithms to address business requests.
- Report findings to both technical and non-technical audience.

Analytical and Technical Requirements

- MSc in Computer Science, Physics, Mathematics, Engineering, Statistics, Data Science, Economy, Finance.
- Organized and outstanding analytical skills.
- Fundamentals of probability, statistic and data modelling.
- Knowledge of Python.
- Teamwork and ability to work within deadlines.
- Fluent English.
- Ability to write technical documentation.
